

2023 Achievements

Baked for NATURE

ACHIEVE NET ZERO CARBON EMISSIONS BY 2050

100%

of our bakeries are LED lighting.

of our paper and board packaging comes from certified materials.

Member of:

Pension Plan portfolio now has ESG/Carbon Neutral considerations.

TOWARDS ZERO WASTE

By 2025, 100% of our packaging is recyclable, biodegradable or compostable.

97%

Increased the proportion of our packaging that is recyclable, **biodegradable or compostable to 97%!**

Reduce water use across all operations by 20% compared to 2019 footprint by 2025.

↓ 3.5%

Reduced water consumption by 3.5% in just one year through equipment upgrades, behaviour changes and steam use audits.

Zero Waste to Landfill at all Production Facility by 2025.

6

6 bakeries that are **Zero Waste to Landfill.**

In the last three years, we've **completed over 100 Sustainability projects** in our facilities that reduce emissions, use greener refrigerants, reduce food waste, save energy, and decarbonize our transport operations.

Invested in new technology with a zero-emission electric shunt truck at our Trillium bakery, **reducing that facility's overall shunting emissions by 72%!**

Achieved a **15% absolute reduction** in direct emissions against our base year of 2019! This reduction is on pace to meet the direct emissions component of our Science Based Target.

More than **45 Electric Vehicle charging stations** available to our associates.

Achieved **6 Energy Star industrial certifications** for our bakeries and **one Energy Star Challenge** – the most achieved by any company in Canada.

Achieved **ZERO Scope 2 emissions (market-based) through wind and solar** Virtual Power Purchase Agreements.

Decarbonized our operations with innovative technology, like an electric boiler at our Winnipeg facility. With Manitoba's clean electricity, this project **reduced the facility's boiler emissions by 98%!**
